

BATTLE OF THE BONDS

"AM I DOING IT RIGHT" ?

\$1450
(+GST)

In this one-day lecture and workshop program, Dr Mandikos will cover the relevant theory of dentine bonding, to ensure attendees understand how bonding works, and what each of the different systems available actually does. He will demystify bonding protocols and bust a few "Urban Myths" along the way.

Then, in a fun and semi-competitive environment, attendees will make their own bond testing specimens with their preferred bond. They will then test their bond strengths in our special bond strength testing machine. It will be Dentist versus Dentist as course attendees go head to head, to see who can achieve the title of Top Bondodontist !

WHAT YOU WILL LEARN

- How dentine and enamel bonding work
- A review of the different bonding systems
- Evidence based techniques – how to bond properly
- How good is your system ? Do your own testing of your own bond!
- When to use silanes and metal primers
- Learn how to assess new dentine bonding systems
- The role of the new Universal Adhesives - are they the future?

Australian Dental Centre of Excellence

* Australian Dental Centre of Excellence is only 25 minutes & 1 traffic light from Brisbane Airport, allowing the possibility of same day travels
