

ULTIMATE COMPOSITES

3-DAY WORKSHOP with Michael Mandikos

Anteriors (Class III, IV & V), Posteriors, and Direct Composite Veneers

THURSDAY 6TH – SATURDAY 8TH MAY 2021

\$4990 + GST

**3 day intensive theory
and practical exercises**

Australian Dental Centre of Excellence
154 Ipswich Road, Woolloongabba
Queensland 4102

Sponsored by

Composite materials continue to evolve and the Clinician has a great choice when it comes to modern systems. Some composites seem to be better suited to aesthetics, some to function and some claim to have universal applications. It is true that when composites are used correctly, they will provide long-lasting, aesthetic restorations, that will biomechanically reinforce the tooth. They just need to be used correctly.

This program has been designed to teach the relevant composite materials science and clinical techniques, to allow the Clinician to understand how to select and how to use modern composite materials, for simple and predictable outcomes.

If you are not sure which type of composite is best for you, what properties to look for, how to create long-lasting and sensitivity free restorations, that are also predictably aesthetic, then this master-class is for you.

What you will learn

- ✓ Current composite technologies including systems designed for single and multi-layered build-ups, Posteriors and Bulkfilling
- ✓ Dentine bonding products and procedures – Etch? Self-etch? Or Universal ?
- ✓ Shade Selection – are some systems actually better than others ?
- ✓ How does the cavity position & design affect prognosis?
- ✓ Liners and bases - do we still need them in the age of adhesive dentistry?
- ✓ Multi-layered techniques – for single teeth and full anterior buildups
- ✓ How to place a composite veneer
- ✓ Getting tight contacts with posteriors
- ✓ Avoiding post-operative sensitivity issues
- ✓ The right instruments for anterior and posterior composites
- ✓ Simple and quick, finishing and polishing procedures
- ✓ Flowable composites – what are the limits?

Online registration at www.ceodental.com.au

This course provides a certificate of attendance for 21 hours of scientific CPD points.

CeoDental Seminars' courses are compliant with current DBA Guidelines on continuing professional development.
