## REGISTRATION FEES

### 2 DAY WORKSHOP

**ANTERIOR AESTHETICS**

Wed 16th - Thurs 17th Nov ..... **\$4,600**

### 1 DAY LECTURE

**COMPOSITE FOR TREATING TOOTH WEAR**

Fri 18th Nov ..... **\$1,400**

**LECTURE AND WORKSHOP TOOTHWEAR**

Fri 18th - Sun 20th Nov ..... **\$7,800**

### 5 DAY MASTERCLASS PACKAGE

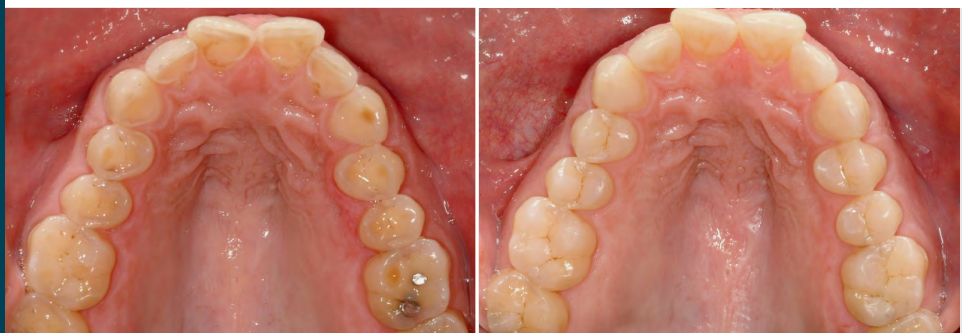

Wed 16th - Sun 20th ..... **\$10,500**

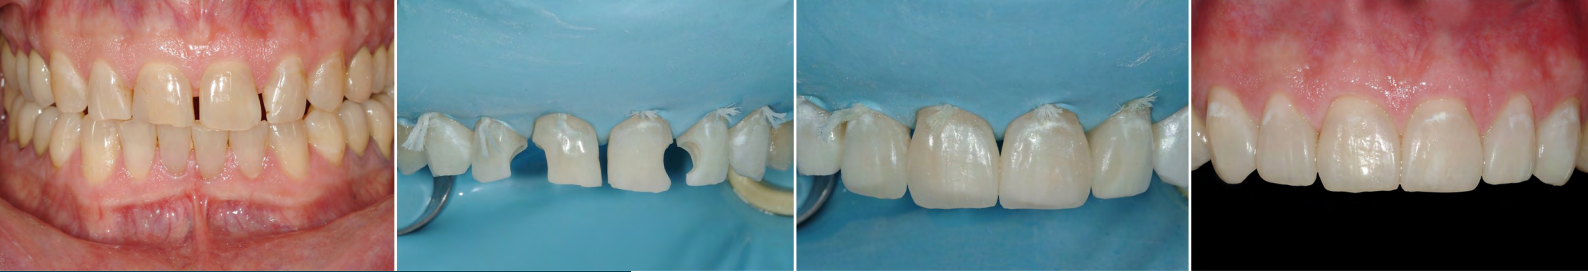

WEDNESDAY 16 AND THURSDAY 17 NOVEMBER

## 2-DAY ULTIMATE ANTERIOR WORKSHOP

*Anterior bio-aesthetics: Better, faster, simpler*

- The present & future of Direct Free-Hand Bonding
- Updated indications for composite in the smile frame
- 1D to 3D diagnostics and treatment planning: merging analog and digital workflows
- Indexes & Mockups: when and how
- Margin design for perfect optical integration: keys to success
- Layering & Shading concepts: simplicity and predictable esthetics
- Shade selection: a key concept in achieving color integration
- Finishing in 3D and 4 simple steps
- Polishing: updated & simplified protocol

## ABOUT THE SPEAKER

Didier is one of those rare individuals who have academic brilliance as well as clinical mastery of their subject. He has written several texts on composites and adhesive dentistry, as well as over 200 articles. He is truly a master of composite dentistry, and in this 5-day program, he will cover all of the important aspects of anterior and posterior composites, no-prep veneers and smile corrections, as well as how to restore the worn dentition.

The optional hands-on workshops will give you the opportunity to work one on one with this master of cosmetic dentistry, to watch his techniques and learn his skills in a smaller group environment. Dr's Rotondo and Mandikos will assist in the workshops to ensure all attendees have the maximum contact with their instructors.

Anyone who aspires to produce high quality aesthetics and function in composite dentistry knows of Didier or has trained with him. You too can join this esteemed group. This is not a program to be missed!

## OUR HOSTS

Tony Rotondo

Michael Mandikos

FRIDAY 18TH TO SUNDAY 20TH NOVEMBER

## INTERCEPTIVE TREATMENT OF TOOTH WEAR

*The breakthrough in managing tooth wear pathologies*

### Treatment concepts

- Etiology & risk factors in tooth wear pathologies
- Diagnostics & evidence based treatment planning
- Risk-factor oriented treatment strategies
- Occlusal concepts & VDO management
- Clinical protocols and restorative material choices
- Direct techniques for posterior teeth (free-hand to full molding protocols)
- Indirect & CAD-CAM techniques for posterior teeth (resin composites to ceramics)
- Direct restoration of incisal edges and palatal surfaces (free-hand and molding protocols)
- Indirect anterior restorations
- Restoration longevity and long-term prognosis

FRIDAY 18TH NOVEMBER

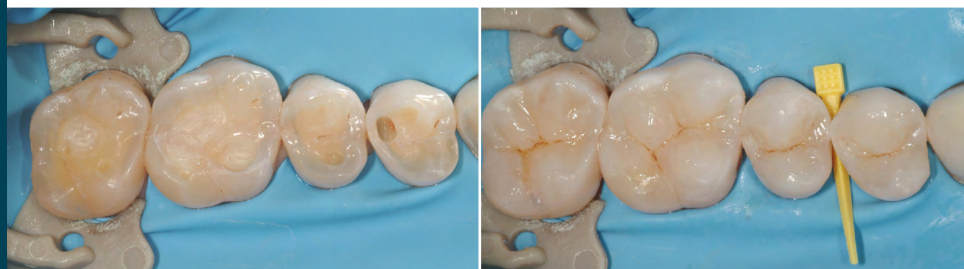

### Composite for Treating Toothwear Lecture

Interceptive treatment of tooth wear – the breakthrough in managing tooth wear pathologies

SATURDAY 19TH - SUNDAY 20TH NOVEMBER

### 2-day Worn Dentition Workshop

An in-depth, hands-on workshop on direct techniques for posterior teeth, and incisal edge bi-laminar build up technique for optimal aesthetics.
