

# HARRY HUGHES MEMORIAL LECTURE BRINGING BACK GOLD!

Understanding the value of gold as a restorative option with Dr Randy Allan DMD.

## Are gold restorations still the Gold Standard?

- ◆ Properties of gold that create longevity
- ◆ Principles of gold preparations to save cusps
- ◆ Inlays on molars, premolars and canines
- ◆ 3/4 crowns and the highly aesthetic 7/8th crown
- ◆ Learn how to correctly cut bevels
- ◆ Instructions for the Laboratory
- ◆ How to finish gold margins down until they are impossible to detect

### Registration Fee: (excl. GST)

|   |        |
|---|--------|
| 1 Day Lecture Only<br>(7CPD points).....                              | \$750  |
| 1 Day Lecture & Day 2 Workshop<br>(Limited places, 14CPD points)..... | \$1990 |
| Registration for Dental Technicians<br>(Lecture only).....            | \$550  |

### What you will learn:

- To fully understand and appreciate the advantages of gold as a restorative material.
- To separate reality from perception in what contributes to patient treatment decisions and why we may be misunderstanding our patients' desires.
- To develop an appreciation for the ability of cast gold restorations to be aesthetic and visually inconsequential.
- To recognise when and where is the best time to use gold as a restorative material.
- To realise the multitude of preparation designs available for long-lasting, aesthetic and rewarding restorations.
- Learn how to correctly prepare for bevels, pins, and cement gold crowns with undetectable margins.

22nd and 23rd  
September 2023

Australian Dental Centre  
of Excellence

154 Ipswich Road,  
Woolloongabba QLD 4102

Presented by  
Dr Randy Allan DMD

Facilitated by  
Dr Michael Mandikos

Conservative, upper arch posterior cast gold restorations, completely non-visible at conversational distance or even a retracted smile.

Online registration at [www.ceodental.com.au](http://www.ceodental.com.au)

This course will provide a certificate of attendance for 14 hours of scientific CPD points. CeoDental Seminars courses are compliant with DBA Guidelines.

## About the presenter:

Dr Randy Allan graduated from the University of British Columbia in 1979 and has been in private practice in Vancouver since that time. In 1984 Dr. Allan became a member of The Richard V. Tucker Cast Gold Study Club of Vancouver, under the mentorship of the great Dr Tucker himself. Dr Allan continues as an active member of that Study Club and is also a Mentor of 3 other Tucker Study Clubs across Canada.. In addition, he has mentored and lectured on the Tucker technique of conservative cast gold

restorations in Italy and the United States, and he has been a clinical instructor at the University of British Columbia over the years. Dr Allan has published articles on "The Aesthetic 7/8 Cast Gold Crown - the Tucker Technique" in the Journal of Operative Dentistry, and the Journal of the Canadian Academy of Restorative Dentistry and Prosthodontics.

Dr Allan is a Member and Past President of the Academy of R. V. Tucker Study Clubs and the Academy of Operative

Dentistry. He recently spoke at the Pacific Dental Conference (2023) in Vancouver on why gold should hold a place in ones restorative practice and has presented to The Academy of Operative Dentistry and The Canadian Academy of Restorative Dentistry and Prosthodontics on similar gold related topics. He is a passionate advocate for the use of correctly designed and placed cast gold restorations as aesthetic and long-lasting conservative restorations.

Modified DOL gold onlay with supplemental pin retention to replace large composite with recurrent proximal caries.

Large failing composite with recurrent caries under mesial box and at distal contact area. Many would do full coverage ceramic. But what is better for the tooth, tissues and aesthetics.

Upper 1st molar aesthetic 3/4 gold crown. Who would know?
