

BACK TO BASICS SERIES

MY FIRST IMPLANT

NEW TO IMPLANTS?

There are many choices for implant courses today, with some designed as hotel-based short courses, whilst others are university based and involve longer periods and some form of certification. There are also many different implant systems on the market today, and the array of implants, types of abutments, associated CAD-CAM systems, and the various claims for superiority by different companies can make the field of implantology seem bewildering.

If you are looking for a place to start your implant training and become familiar with the processes to allow you to plan and restore dental implants, then this program is for you.

WHAT YOU WILL LEARN

- Case selection
- Introduction to various implant systems and components (See and feel the components of various implant systems)
- Surgical guides and working with a surgeon
- Impressions for Dental Implants
- Provisional restorations
- Insertion and delivery of the case

Dr Michael Mandikos

Date: 16th & 17th October, 2020
Venue: Australian Dental Centre of Excellence
154 Ipswich Road Woolloongabba QLD 4102
Presenter: Dr Michael Mandikos
Registration: www.ceodental.com.au

This 2-day, hands-on program will be presented from the perspective of the Restorative Dentist, and will allow attendees to become familiar with the important aspects of implant treatment. This program will address, in suitable depth, all of the key aspects of implant treatment planning, surgical stents and guides, selection of abutments and crowns, impression techniques, and delivery of the final restorations, with multiple case examples and hands-on exercises.

See the demonstrations in great detail, practice the techniques at your own workstation.
